FALLER-BASTELMESSER

- D** Beim Zusammenbau des Modells ist es wichtig, die Hinweise »nicht kleben« genau zu beachten. Werden diese Hinweise nicht beachtet, ist das Modell nicht funktionsfähig. Alle beweglichen Teile müssen leicht gängig sein. Alle Lagerstellen mit einem Tropfen FALLER-Öl Art. Nr. 180489 ganz leicht einölen. Nur säure- und harzfreies Öl verwenden.

Für die Montage benötigen Sie Plastik-Klebstoff, Sekundenkleber und einen Öler.
Wir empfehlen:
FALLER-Klebstoff EXPERT (Art. Nr. 170492)
FALLER-Sekundenkleber EXPERT RAPID (Art. Nr. 170500)
FALLER-Spezial-Seitenschneider (Art. Nr. 170688)
FALLER-Bastelmesser (Art. Nr. 170687)

- GB** When the model is being assembled, it is essential that the »do not glue« instructions should be observed. Failure to do so will render the model inoperational. Make sure that all moving parts work smoothly. Sparingly oil all bearing points by applying a drop of FALLER oil, art. no. 180489. Use acid and resin-free oil only.

For mounting you need plastic cement, split-second modelling cement and an oiler.
Our recommendation:
FALLER cement EXPERT (Art. No. 170492)
FALLER instant modelling cement EXPERT RAPID (Art. No. 170500)
FALLER special side cutter (Art. No. 170688)
FALLER modeller's knife (Art. No. 170687)

- F** Au cours du montage du modèle, il est important de respecter très exactement les indications: »ne pas coller«. Si ces indications ne sont pas respectées, le modèle ne pourra fonctionner correctement. Toutes les parties mobiles doivent être en bon état de marche. Enduire légèrement tous les points d'appui d'une goutte d'huile FALLER, (Article 180489). Ne pas utiliser d'huile d'acide ou de résine.

Pour le montage, utiliser de la colle plastique, de la colle rapide et un huileur spéciale. Nous vous recommandons les produits suivants:
FALLER cement EXPERT (Art. No. 170492)
FALLER instant modelling cement EXPERT RAPID (Art. No. 170500)
FALLER special side cutter (Art. No. 170688)
FALLER modeller's knife (Art. No. 170687)

- NL** Bij de bouw van het model is het belangrijk te letten op de aanwijzingen »niet lijmen«. Als deze aanwijzingen niet worden opgevolgd zal het model niet functioneren. Alle beweegbare delen moeten gemakkelijk kunnen draaien. Alle draaipunten moeten licht worden geölief met een druppel FALLER-olie nr. 180489. Alleen zuur- en harsvrije olie gebruiken.

Voor de montage heeft u plasticlijm, secondenlijm en olie nodig. Wij adviseren:
FALLER-plasticlijm EXPERT (Art. Nr. 170492)
FALLER-Secondenlijm EXPERT RAPID (Art. Nr. 170500)
FALLER-speciaal zijknijptang (Art. Nr. 170688)
FALLER-knutselmes (Art. Nr. 170687)

Hier eine durchgehende Klebnaht anbringen, um das Eindringen von Wasser zu vermeiden.

Apply a continuous glue seam here, so as to avoid the ingress of water.

Effectuer une couture collée de bout en bout pour empêcher une introduction d'eau.

Om binnendringen van water te voorkomen, moet hier een goed afsluitende lijmmaad worden aangebracht.

8 mm

Füllen Sie Wasser in die Bodenplatte ein, aber nur in das Feld, in dem sich die Pumpen befinden.

ACHTUNG: benutzen Sie kein destilliertes und kein Leitungswasser (Verkalkungsgefahr).

Bitte nur Tafelwasser ohne Kohlensäure verwenden!

Das Wasser sollte bis an die Oberkante der 8 mm hohen Rippen reichen.

Dann schließen Sie die zwei Motoren (Art. Nr. 180629) und die zwei Pumpen (Art. Nr. 180627) an Ihren Trafo (16 V, Wechselspannung) an.

Wenn die Fließbänder und die Pumpen störungsfrei laufen, können Sie die Fahrzeuge in die Fahrbahn einsetzen.

Sie sollten den Probelauf sorgfältig und ausgiebig (ca. 1 Stunde) vornehmen, bevor Sie den Bau des Modells fortsetzen.

Es empfiehlt sich zur Fertigstellung des Modells das Wasser aus der Bodenplatte wieder zu entleeren.

Fill water into the field of the baseplate in which the pumps are located.

Attention: do not use distilled water or tap water (calcification risk).

Only use table water without carbonic acid.

The water should reach up to the top edge of the 8 mm high ribs.

Then connect the two motors (art. 180629) and the two pumps (art. 180627) to your transformer (16 V AC). If the conveyor belts and the pumps run properly, you can place the vehicles onto the track. The test run should be made carefully and for an extended period of time (approx. one hour) before you go on building your model. For completion of the model, it is recommended to drain the water from the baseplate again.

Introduire l'eau dans la plaque de fond, mais uniquement dans le compartiment dans lequel se trouvent les pompes.

ATTENTION : ne pas utiliser d'eau distillée ou du robinet (risque d'entartrage).

N'utiliser que de l'eau en bouteille sans gaz carbonique.

L'eau doit atteindre le bord supérieur des nervures d'une hauteur de 8 mm.

Brancher ensuite les deux moteurs (art. 180629) et les deux pompes (art. 180627) sur votre trafo (16 V c.a.). Dès que les convoyeurs et les pompes fonctionnent normalement, vous pouvez placer les véhicules sur la chaussée. La marche d'essai doit être effectuée soigneusement et pendant env. 1 heure, avant de continuer le montage du modèle.

Il est recommandé d'enlever l'eau de la plaque de fond pour achever le modèle.

Giet water in het bodemreservoir, maar alleen daar, waar de pompen zijn geplaatst.

LET OP: gebruik geen gedistilleerd water en geen leidingwater (gevaar voor kalk).

S.v.p. alleen tafelwater zonder koolzuur gebruiken.

Het water moet reiken tot de bovenkant van de 8 mm hoge randen!

Sluit daarna de twee motoren (nr. 180629) en de twee pompen (nr. 180627) aan op de trafo (16 V, wisselstroom). Als de transportbanden en de pompen zonder storingen werken, kunnen de voertuigen in de vaargoot worden gezet. De proefvaart moet nauwkeurig en langdurig (ongeveer 1 uur) worden uitgevoerd voordat verder aan de bouw van het model kan worden gewerkt. Het is raadzaam pas verder te bouwen na het leeggieten van de bodemplaat.

Pflege- und Service-Hinweise

Bei längerem Nichtbenützen und zur Reinigung der Wildwasserbahn, entleeren Sie bitte das Wasserbecken und beseitigen Sie mittels Lappen und lauwarmem Wasser die Staubablagerungen und evtl. Schmutzrückstände.

ACHTUNG: Keine Reinigungsmittel verwenden, das Wasser schäumt sonst bei neuerlicher Inbetriebnahme !!!

Achten Sie bitte darauf, daß der Wasserspiegel nicht tiefer als die Pumpenansaughöhe sinkt, da ansonsten die Pumpen trockenlaufen und Schaden nehmen können.

Bei Wiederinbetriebnahme nur Wasser auf Rippen-Oberkantenhöhe 8 mm einfüllen.

Sollten Sie anderweitige Fragen haben, unsere Service-Abteilung hilft Ihnen gerne weiter.

Maintenance and service instructions

If the wildwater race track is not used for a longer period of time and for cleaning it, drain the water basin, please, and remove any dust deposits and residual dirt by a rag and lukewarm water.

ATTENTION: Do not use a cleaning agent, else the water will foam on restarting !!!

See to it that the water level does not drop below the pump's suction head, else the pumps may run dry and may suffer damage. For restart, fill in water only up to the rib top edge height of 8 mm.

If you have any more questions, please do not hesitate to contact our service department.

Instructions d'entretien et de maintenance

Lors d'arrêt de longue durée et pour le nettoyage de la trajectoire du torrent, vider le bassin d'eau et enlever avec un chiffon et de l'eau tiède les dépôts de poussière et d'éventuels résidus de saleté.

ATTENTION: ne pas utiliser de produits de nettoyage, sinon l'eau mousse à la remise en service !!!

Veiller à ce que le niveau d'eau ne descende pas en-dessous de la hauteur d'aspiration de la pompe, sinon les pompes marchent à vide et peuvent être endommagées.

A la remise en service, remettre uniquement de l'eau jusqu'au bord supérieur 8 mm des nervures.

Si vous avez d'autres questions, notre service après-vente est toujours à votre disposition.

Onderhoud- en service-adviezen

Als de wildwater baan langere tijd niet wordt gebruikt en schoongemaakt, moet vóór de eerst volgende ingebruikname alles wat met de »exploitatie« te maken heeft, goed worden schoongemaakt. Laat alles leeglopen en verwijder met een lap en lauwarm water overal alle stof en vuil.

LET OP: gebruik geen schoonmaakmiddel;

het water gaat anders schuimen als u opnieuw begint !!!

Let er vooral op, dat de waterspiegel niet lager komt dan de opzuighoogte van de waterpomp, omdat deze anders droogloopt en beschadigd wordt. Bij opnieuw in gebruik nemen moet water voor vulling tot 8 mm hoog worden ingegoten. Als u nog vragen heeft over dit bouwpakket, kan onze service-afdeling u verder informeren.
